MARGARET MUTHONI

margaret_muthoni@outlook.com | margaret-muthoni.github.io | Kenya

PROFESSIONAL SUMMARY

Data Analyst with 3+ years of experience across business intelligence, multi-source data reconciliation, financial and operational reporting, data quality assurance, and donor-funded program assurance. Proven experience in cleaning and structuring datasets, reconciling information from multiple sources, developing dashboards in Looker Studio and Excel, and translating quantitative data into actionable management insights. Experience spans donor assurance at PwC (agricultural and international donor-funded programs), operational workflow optimisation at Matthew & Partners, and inventory data management and reporting at Timber Tank Enterprises. Holds a Bachelor of Economics and Statistics, FMVA certification, in-progress CPA(K), and specialised training in Data Protection.

CORE COMPETENCIES

Data Architecture & Quality: Multi-source reconciliation, deduplication, schema validation, exception tracking, data standardisation, and data integrity audits.

Business Intelligence & Dashboards: Looker Studio, Power BI, Excel Power Query, interactive KPI scorecards, performance segmentation, and inventory turnover modelling.

Program & Field Data Assurance: Donor-funded program audits, agricultural programme data assurance, field verification workflows, input tracking, and grant compliance.

Financial & Commercial Analytics: Financial modelling, cash flow forecasting, fee-earner realisation, sales route analysis, and billing exception tracking.

Governance & Stakeholder Alignment: Translating technical findings for non-technical leadership, PII protection, and cross-functional team coordination.

PROFESSIONAL EXPERIENCE

Operations & Data Reporting Consultant | Matthew & Partners LLP

March 2026 - November 2026 | Nairobi, Kenya

- Reconciled multi-platform financial and operational datasets across Clio, FreshBooks, ClickUp, and bank records, investigating and resolving discrepancies involving client retainers, work-in-progress, VAT and withholding tax to improve the accuracy of billing and financial reporting.
- Diagnosed operational delivery bottlenecks by auditing 5 months of ClickUp workflow logs; built an automated Excel performance dashboard showing a high rate of delays across both open and completed tasks, providing management with insights to inform task allocation, prioritisation and workflow improvements.
- Isolated pure legal fee-earner revenue from pass-through disbursements and statutory fees, delivering transparent weekly realisation and collection reports.
- Developed dynamic financial projection models for a newly launched business unit, incorporating revenue forecasts, operating cost structures, and cash flow schedules.

Operations Consultant | Timber Tank Enterprises

November 2025 - February 2026 | Nairobi, Kenya

- Led a team of three in digitising, cleaning, and structuring 4,000+ historical inventory and sales records from unstructured physical logs and fragmented spreadsheets.
- Built a centralised master inventory schema with strict data validation rules, standardising timber species, dimensions, and seasoning grades.
- Automated data-cleaning pipelines using Excel Power Query to eliminate duplicates, resolve missing fields, and flag quantity discrepancies against sales receipts.
- Developed an interactive Looker Studio dashboard to improve visibility of stock levels, fast-moving inventory and dead stock, enabling more informed inventory monitoring and management.

Senior Associate – Audit & Public Sector Advisory | PricewaterhouseCoopers (PwC)

September 2023 - October 2025 | Nairobi, Kenya

- Executed on-site financial, operational, and compliance audits across rural operational hubs in Kenya for agricultural and donor-funded programs, including a national commodities exchange and an international agroforestry programme supporting smallholder farmer community groups.
- Conducted physical warehouse inventory counts, smallholder input disbursement verifications, and grain receipt testing against central ledgers and bank statements.

- Reconciled field-level farmer training attendance sheets, seedling/input delivery registers, and community group expenditure claims against central disbursement schedules, resolving reporting mismatches between field extension staff and finance controllers.
- Evaluated performance indicators, procurement files, and internal controls across 15+ programs funded by multilateral and bilateral donors, ensuring strict adherence to grant compliance frameworks.
- Conducted verification of programme and financial documentation during donor-commissioned assurance engagements, assessing the consistency and reliability of reported information against supporting evidence.
- Led engagement teams of 3–5 associates, managing audit testing, reviewing working papers, and presenting executive summaries to senior program directors and donor representatives.
- Enforced strict compliance with data confidentiality and donor reporting governance protocols.

Data Analyst – Sales Department | Tropical Heat Ltd.
April 2023 - July 2023 | Nairobi, Kenya

- Synthesised regional sales performance against commercial targets, producing recurring visual reports and market segment breakdowns for executive management.
- Reconciled daily field sales submissions, route logs, and expense claims against inventory movements, identifying inconsistencies and exceptions in submitted sales information to improve the reliability of operational and sales reporting.
- Benchmarked regional competitor pricing and product distribution to inform commercial strategy.

EDUCATION

Bachelor of Economics and Statistics | University of Nairobi (2018–2022), Second Class Honours, Upper Division

Certified Public Accountant (CPA-K) | KASNEB. Foundational Level completed; Intermediate Level in progress.

Financial Modelling & Valuation Analyst (FMVA) | Corporate Finance Institute (2022)

ALX Data Analytics Programme | May 2023 – August 2024

TECHNICAL SKILLS & TOOLS

Data Analysis & Modelling: Microsoft Excel (Advanced: Power Query, PivotTables, XLOOKUP, INDEX-MATCH), Google Sheets.

Business Intelligence & Dashboards: Looker Studio, Power BI.

Database & Querying: SQL, SQLite.

Statistical Software: Python, R, Stata, SPSS.

CERTIFICATIONS & COMPLIANCE

Introduction to Data Protection | Strathmore University / CIPIT (Sept 2026 – Oct 2026). Data Privacy, PII Governance, Access Control.
